Accpac Solutions for Food and Beverage Manufacturers and Distributors

Accpac Solutions in Africa

It is impressive to know that after 20 years in Africa, Softline Accpac continues to deliver again and again in our ever changing world. A world that unflinchingly demands the highest level of service and latest technology to deliver lasting benefits and reduced cost of ownership. Softline Accpac provides this with a scalable set of solutions which allow you to grow, from the modular Accpac ERP suites into our web based all-in-one ERP solution, Sage ERP X3.

Softline Accpac's suite of solu
tions follow your pace of growth, adapting to your unique require-ments, deferring to your choice of database and deployment preferences while flexing with your organizational structure. Softline Accpac's range of mid-market and enterprise solutions provide full service enterprise management software capable of meeting the most elaborate business processes whilst remaining simple to use.

Softline Accpac Solutions are powerful toolsets that help you confidently streamline time-consuming financial (GAAP and IFRS) and operational processes using advanced workflow, alerting and business process management technologies. Moreover, the breadth of Softline Accpac's Solutions extend to supply chain management, warehousing/logistics, service management and mixed mode manufacturing with quality control and document management.

Needless to say Softline Accpac provides award winning CRM functionality as an integrated or stand alone offering to all our ERP customers delivering classic CRM components including sales force automation, customer care, marketing including emarketing and web self service portals.

Regardless of your role within your company or your business challenges, Softline Accpac has the right solutions for you to improve and extend your reach through collaboration with customers, suppliers and stakeholders to manage the entire lifecycle of a customer from first contact to final contract.

Softline **ACCPAC**®

the future of better business

Facing new requirements and changing regulations

Changing regulations in the Food & Beverage industry are causing companies to re-evaluate their systems and processes. With legislation such as the Bioterrorism Act of 2002, food and beverage companies are assessing crucial functions such as ingredient and lot traceability, as well as their quality control procedures, to see how well they comply with the new requirements.

The key features that drive the success of an ERP implementation in this environment include:

- Complete forward and backward lot traceability for each ingredient and end-item.
- Full audit trail & archive of historical transactions.
- Fully-integrated quality control for inspections to assure conformance to any required characteristics, operational tolerances or expected results.
- Inspections can be conducted at receiving or any stage of the production and packaging processes.
- Suspicious items or those that fail any inspection rules are automatically quarantined. All Rules Based.

For more information on how Accpac Solutions can fit your business, please feel free to contact us as detailed below for a FREE needs assessment or product presentation tailored to your needs.

Keith Fenner
Vice President, Strategic Sales

- Import Tracking allows tracking of imported goods from the time of shipping through to loading on the container and subsequently the vessel used until receipted in your warehouse. This allows for complete transparency in the supply chain and permits multiple landed costs to be accurately handled.
- Warehouse management is entirely integrated in the suite and ensures proper management of picking and put-aways as well as efficient utilization of warehouse space.
- Complete industry-specific functionality including the management of formulas and recipes, potency, by-products, multiple packaging units per product, shelf-life, lot control and traceability, specific gravity, weight calculations ... and much more!
